## PERFECT TASTE WITH NEW PACKAGING

### ABOUT US

Selva Food was established in 1988 under the name Ittifak Flour Inc. in Konya. In a short time, it grew a lot, and formed the basis of today's Loras Holding. Selva Food, which started producing pasta and semolina as well in 1994, has become a popular brand in Turkey and the world with its innovative products.

#### ACTIVITY AREA

Selva Food, with its wheat flour, pasta and semolina product range, is a brand preferred by consumers for its quality in the FMCG and Out-of-Home markets.

#### OUR COMMITMENT TO SUSTAINABILITY

We aim to create a world where everyone has the right to a healthy and good life by reducing our negative impact on the environment and transforming it for the better through sustainable business models.

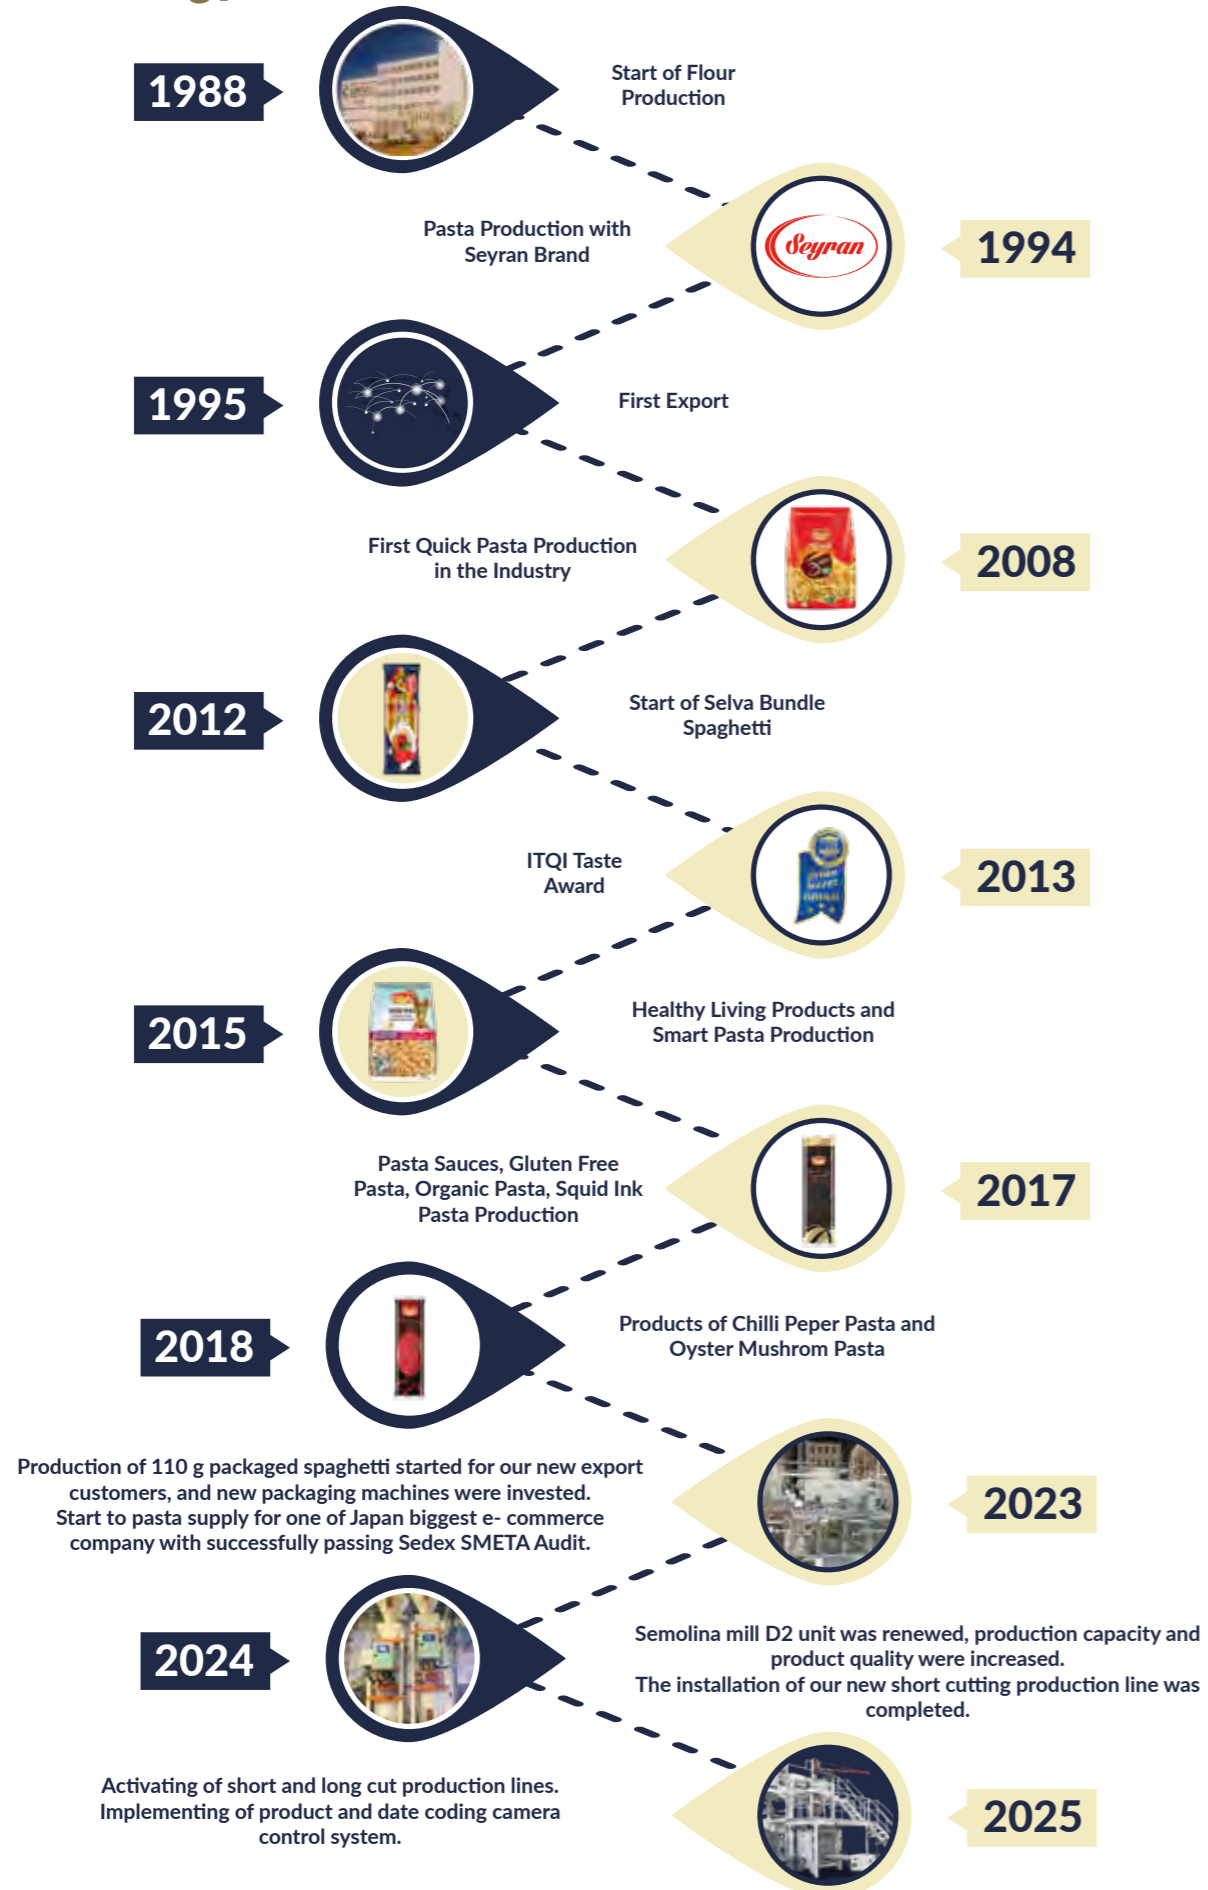

#### HEALTHY LIFE WITH SELVA FLAVOR

Believing that everyone has the right to a healthy life, Selva Food prioritizes the health of its consumers in all processes, from raw material purchasing to after-sales services. Selva pasta's ingredients consist only of durum wheat semolina and water, and there are no additives used in its production. Pasta has an important role in a balanced and healthy diet with its protein ratio, fiber balance and low glycemic index. Thanks to wheat flour, Selva shares the ancient abundance of Anatolia with the Turkish and world cuisine, taking care of the health of its consumers.

#### SELVA QUALITY

Selva Food, which works in line with the responsible production approach by prioritizing customer satisfaction and health within the sustainable value chain, is preferred by its consumers for its quality, and it adds value to the lives of its internal and external stakeholders with food safety, consumer satisfaction and traceable business processes.

## Chronology
